Community REACH Equity Study

Women's Health Awareness

Community Resiliency, Environmental Action, and Collaborations for Health (REACH) Equity Study

Empower, Connect, Engage, and Advocate to Create Positive Change for Your Community!

This research study seeks to understand the long-term impacts of COVID-19 on minority women and their families to assist in developing community-based programs for recovery and resiliency. By participating in all study activities, you may receive up to \$155.

Who can participate?

- Females who are African American or Black, Hispanic or Latino, American Indian or Alaskan Native, Asian American, Native Hawaiian, or other Pacific Islander.
- Aged 18 years or older.
- Reside in North Carolina.

What is required?

Completing a 45-minute survey is all that is required.

Participants may choose to participate in and be paid for additional activities including:

- Collecting urine samples and log.
- Collecting house dust samples.
- Collecting and providing saliva samples.
- Collecting and providing toenail clippings.
- Wearing a silicone wristband for up to a week to measure air in your environment.
- Providing a blood sample.
- Completing a 15-minute reproductive health survey.
- Having a single one-hour clinic visit including a blood draw (up to 4 teaspoons) and vital signs.

Who is running the study?

A team, led by Joan Pakenham, Ph.D., at the National Institute of Environmental Health Sciences in Research Triangle Park, North Carolina.
