

Volunteers Needed for Studies on Environmental Health

Young people, 8-17 years old, are invited to join the Environmental Polymorphisms Registry (EPR), a study to discover how the environment influences the development of disease. The study is being conducted by the National Institute of Environmental Health Sciences (NIEHS), part of the National Institutes of Health (NIH).

What's required?

- One visit to donate a blood sample
- Agree to update contact information every year
- Agree to be contacted for follow-up research studies

Volunteers will be compensated \$20.

For more information:

- Call 1-866-809-1261
- Email info@eprdna.niehs.nih.gov
